

XANH SM - CURRENT-STATE WORKFLOW

Dispatcher handling an EV low-battery incident

[1] Driver reports low battery / incident (2 min)

HANDOFF: Driver -> Dispatcher

|

[2] Dispatcher records plate, battery and location (2 min)

|

[3] Search charging station availability and connector (5 min)

BOTTLENECK: manual dashboard and compatibility check

|

[4] Write directions and response message (5 min)

BOTTLENECK: manual drafting and data re-check

|

[5] Dispatcher reviews, sends guidance or calls rescue (1-3 min)

HANDOFF: Dispatcher -> Driver / Mobile rescue team

Estimated manual total: 15 minutes per incident

Safety note: battery below 5% requires mobile charger review.
